# Guide for staff

This Resource Pack has been developed to support mental health service providers who have Oxevision on their ward.

**What is included in this resource pack?**

1. Patient and Carer Leaflet — print ready files

2. Poster — print ready files

3. Information Sheets — print ready files

- Guide for staff: How to use this resource pack on the ward

- How to communicate and engage with service users, carers, friends and families

- How Oxevision measures your pulse rate, breathing rate and movement

- How Oxevision gives you information on your progress

- List of notifications provided by Oxevision

- What staff can see on the Oxevision "home screen"

- Further information on privacy and data

- Further information on consent

**How to use this pack**

The pack is intended to enable you to localise versions of the Patient and Carer Leaflet and Poster.

The pack includes print ready files where you can insert your:

- Trust logos
- Ward names
- Points of contact for staff

There is an Oxevision Image Repository which contains images that can be used in place of the images already in the Patient and Carer Leaflet and Poster.

Should you wish to make changes to images or would like support in localising the Poster and Leaflet please contact Oxehealth on cst@oxehealth.com

The Information Sheets provide further information around specific aspects of Oxevision which patients may wish to know more about.

**Using the content once printed**

A senior member of staff should be nominated to check that:

- Patient and carer information materials produced by the organisation continue to adhere to the Resource Pack
- Patient and Carer Leaflets are present and accessible for staff to use with patients and carers on each ward where Oxevision is in use
- Additional Information Sheets are present and accessible for staff to use with patients and carers on each ward where Oxevision is in use
- A ward Poster is present in the communal area in an appropriate location where patients and carers can see it

Need more information or have a question?

Please contact Oxehealth customer service if you have any questions.
